Subject Index

Acid sites
Kinetics of methanol dehydration on dealuminated H-mordenite: Model with acid and basic active centres 139

Acidity
Structure of MoO_3/Al_2O_3–SiO_2 catalysts 205

Adsorption
Photocatalytic degradation of nitrophenols in aqueous titanium dioxide dispersion 323

Adsorption
Adsorption and catalytic properties of Pd/SiO_2, Cu/SiO_2, and Pd–Cu/SiO_2 systems. I. Hydrogen, carbon monoxide and oxygen adsorption on Pd/SiO_2 and Cu/SiO_2 269

Adsorption
Adsorption and catalytic properties of Pd/SiO_2, Cu/SiO_2, and Pd–Cu/SiO_2 systems. III. Carbon monoxide and benzene hydrogenation over Pd–Cu/SiO_2 catalysts 305

Adsorption
Adsorption and catalytic properties of Pd/SiO_2, Cu/SiO_2, and Pd–Cu/SiO_2 systems. II. Hydrogen, carbon monoxide and oxygen adsorption on Pd–Cu/SiO_2 catalysis 291

Alumina support
Propene oligomerization catalyst derived from nickel sulfate supported on γ-alumina 1

Aluminium hydroxide
Interrelation between structural and mechanical characteristics of spherical alumina granules and the initial hydroxide properties 65

Ammonia
Influence of the preparation method on the $V_2O_5/TiO_2/SiO_2$ catalysts in selective catalytic reduction of nitric oxide with ammonia 149

Aqueous phase
Aqueous phase hydroformylation of propene catalyzed over rhodium complexes immobilized on the poly(styrene–divinylbenzene) copolymer containing $-CH_2P(C_6H_4SO_3H)_2$ groups 169

Basic sites
Kinetics of methanol dehydration on dealuminated H-mordenite: Model with acid and basic active centres 139

Benzene oxidation
Complete catalytic oxidation of benzene over supported vanadium oxides modified by silver 221

Benzoic acid oxidation
Oxidation of benzoic acid to phenol in the vapor phase III. Reaction of phenol precursors over copper catalysts 201

C_2 hydrocarbons
Oxidative conversion of methane to C_2 hydrocarbons over Li, Mn, Cd and Zn promoted MgO catalysts II: Performance of fresh and reoxidised catalysts in the absence of free oxygen 187

Calcium aluminate catalyst
Mechanistic model for the catalytic cracking of n-hexane over calcium aluminate catalysts for producing light alkenes 105

Carbon monoxide hydrogenation
Adsorption and catalytic properties of Pd/SiO_2, Cu/SiO_2, and Pd–Cu/SiO_2 systems. III. Carbon monoxide and benzene hydrogenation over Pd–Cu/SiO_2 catalysts 305

Catalyst characterization (DTA, FT-IR, ICP, TPD, XRD)
Synthesis of zeolite β and catalytic isomerization of n-hexane over Pt/H-β catalysts 49

Catalyst characterization (IR, UV-Vis, XRD)
Structure of MoO_3/Al_2O_3–SiO_2 catalysts 205

Catalyst characterization (NMR)
Solid-state NMR investigations of $AlPO_4$-8: Its transformation from VPI-5 and interaction with water L7

Catalyst characterization (surface area, XRD)
Bulk alloy formation during metal ion poisoning of palladium 85

Catalyst characterization (surface area, XRD)
Synthesis and characterization of pillared montmorillonite catalysts 97

Catalyst characterization (surface)
Number of surface V = O species of promoted $(VO)_2P_2O_7$ catalysts L1

Catalyst characterization (TEM)
Hydroconversion of n-nonane catalyzed by PdHY zeolites. I. Influence of catalyst pretreatment 15

Catalyst characterization (TPD, TPO, TPR)

Interaction of hydrogen and oxygen with niobia-supported and niobia-promoted rhodium catalysts 253
Catalyst characterization (XPS)
Effect of metal-organic compounds on thiophene hydrodesulphurization over sulphided forms of fluoride-containing $CoMo/Al_2O_3$ catalysts 235
Catalyst preparation (batch)
Solid-state NMR investigations of $AlPO_4$-8: Its transformation from VPI-5 and interaction with water L7
Catalyst preparation (colloidal processes)
Interrelation between structural and mechanical characteristics of spherical alumina granules and the initial hydroxide properties 65
Catalyst preparation (deposition)
Influence of the preparation method on the $V_2O_5/TiO_2/SiO_2$ catalysts in selective catalytic reduction of nitric oxide with ammonia 149
Catalyst preparation (hydrothermal treatment, impregnation)
Synthesis of zeolite β and catalytic isomerization of n-hexane over Pt/H-β catalysts 49
Catalyst preparation (ion exchange)
Adsorption and catalytic properties of Pd/SiO_2, Cu/SiO_2, and $Pd–Cu/SiO_2$ systems. I. Hydrogen, carbon monoxide and oxygen adsorption on Pd/SiO_2 and Cu/SiO_2 269
Catalyst preparation (pillaring)
Bulk alloy formation during metal ion poisoning of palladium 85
Catalyst preparation (pillaring)
Synthesis and characterization of pillared montmorillonite catalysts 97
Chromium promotion
Hydroconversion of n-nonane catalyzed by PdHY zeolites. II. Effect of chromium promoter 33
Cobalt–molybdenum/alumina
Effect of metal-organic compounds on thiophene hydrodesulphurization over sulphided forms of fluoride-containing $CoMo/Al_2O_3$ catalysts 235
Coke formation
Shape selective catalysis by ZSM-35 zeolites. Disproportionation of ethylbenzene and isomerization of m-xylene 177
Computer estimations
Computer estimation of kinetic parameters in propionitrile hydrogenation on a supported nickel catalyst 75
Copper
Oxidation of benzoic acid to phenol in the vapor phase III. Reaction of phenol precursors over copper catalysts 201
Copper ion
Influence of sulfur dioxide on catalytic removal of nitric oxide over copper ion-exchanged ZSM-5 zeolite L15
Copper/silica
Adsorption and catalytic properties of Pd/SiO_2, Cu/SiO_2, and $Pd–Cu/SiO_2$ systems. III. Carbon monoxide and benzene hydrogenation over $Pd–Cu/SiO_2$ catalysts 305
Copper/silica
Adsorption and catalytic properties of Pd/SiO_2, Cu/SiO_2, and $Pd–Cu/SiO_2$ systems. I. Hydrogen, carbon monoxide and oxygen adsorption on Pd/SiO_2 and Cu/SiO_2 269
Copper/silica
Adsorption and catalytic properties of Pd/SiO_2, Cu/SiO_2, and $Pd–Cu/SiO_2$ systems. II. Hydrogen, carbon monoxide and oxygen adsorption on $Pd–Cu/SiO_2$ catalysis 291
Deactivation
Shape selective catalysis by ZSM-35 zeolites. Disproportionation of ethylbenzene and isomerization of m-xylene 177
Dehydration
Solid-state NMR investigations of $AlPO_4$-8: Its transformation from VPI-5 and interaction with water L7
Dispersion
Hydroconversion of n-nonane catalyzed by PdHY zeolites. I. Influence of catalyst pretreatment 15
Dispersion
Hydroconversion of n-nonane catalyzed by PdHY zeolites. II. Effect of chromium promoter 33
Dispersion
Influence of the preparation method on the $V_2O_5/TiO_2/SiO_2$ catalysts in selective catalytic reduction of nitric oxide with ammonia 149
Ethylbenzene disproportionation
Shape selective catalysis by ZSM-35 zeolites. Disproportionation of ethylbenzene and isomerization of m-xylene 177

Extra-framework aluminium
Hydroconversion of n-heptane over dealuminated zeolite catalysts 341
Heptane hydroconversion
Hydroconversion of n-heptane over dealuminated zeolite catalysts 341
Hexane isomerization
Synthesis of zeolite β and catalytic isomerization of n-hexane over Pt/H-β catalysts 49
Hexane pyrolysis
Mechanistic model for the catalytic cracking of n-hexane over calcium aluminate catalysts for producing light alkenes 105
Hydration
Solid-state NMR investigations of $AlPO_4$-8: Its transformation from VPI-5 and interaction with water L7
Kinetics
Computer estimation of kinetic parameters in propionitrile hydrogenation on a supported nickel catalyst 75
Kinetics
Mechanistic model for the catalytic cracking of n-hexane over calcium aluminate catalysts for producing light alkenes 105
Kinetics
Kinetics of methanol dehydration on dealuminated H-mordenite: Model with acid and basic active centres 139
Kinetics
Photocatalytic degradation of nitrophenols in aqueous titanium dioxide dispersion 323
Magnesium oxide
Oxidative conversion of methane to C_2 hydrocarbons over Li, Mn, Cd and Zn promoted MgO catalysts II: Performance of fresh and reoxidised catalysts in the absence of free oxygen 187
Methane conversion
Oxidative conversion of methane to C_2 hydrocarbons over Li, Mn, Cd and Zn promoted MgO catalysts II: Performance of fresh and reoxidised catalysts in the absence of free oxygen 187
Methanol
Adsorption and catalytic properties of Pd/SiO_2, Cu/SiO_2, and $Pd–Cu/SiO_2$ systems. III. Carbon monoxide and benzene hydrogenation over $Pd–Cu/SiO_2$ catalysts 305
Methanol dehydration
Kinetics of methanol dehydration on dealuminated H-mordenite: Model with acid and basic active centres 139
Micropore structure
Isomerization and disproportionation of m-xylene over zeolite β 125
Molecular sieves
Solid-state NMR investigations of $AlPO_4$-8: Its transformation from VPI-5 and interaction with water L7
Molybdenum oxide/alumina–silica
Structure of $MoO_3/AL_2O_3–SiO_2$ catalysts 205
Montmorillonite
Bulk alloy formation during metal ion poisoning of palladium 85
Montmorillonite
Synthesis and characterization of pillared montmorillonite catalysts 97
Nickel
Computer estimation of kinetic parameters in propionitrile hydrogenation on a supported nickel catalyst 75
Nickel naphthenate
Effect of metal-organic compounds on thiophene hydrodesulphurization over sulphided forms of fluoride-containing $CoMo/Al_2O_3$ catalysts 235
Nickel sulfate
Propene oligomerization catalyst derived from nickel sulfate supported on γ-alumina 1
Nitric oxide
Influence of sulfur dioxide on catalytic removal of nitric oxide over copper ion-exchanged ZSM-5 zeolite L15
Nitric oxide reduction
Influence of the preparation method on the $V_2O_5/TiO_2/SiO_2$ catalysts in selective catalytic reduction of nitric oxide with ammonia 149
Nitrophenol degradation
Photocatalytic degradation of nitrophenols in aqueous titanium dioxide dispersion 323
Nonane hydroconversion
Hydroconversion of n-nonane catalyzed by PdHY zeolites. I. Influence of catalyst pretreatment 15
Nonane hydroconversion
Hydroconversion of n-nonane catalyzed by PdHY zeolites. II. Effect of chromium promoter 33

Palladium/silica
Adsorption and catalytic properties of Pd/SiO_2, Cu/SiO_2, and $Pd–Cu/SiO_2$ systems. III. Carbon monoxide and benzene hydrogenation over $Pd–Cu/SiO_2$ catalysts 305
Palladium/silica
Adsorption and catalytic properties of Pd/SiO_2, Cu/SiO_2, and $Pd–Cu/SiO_2$ systems. II. Hydrogen, carbon monoxide and oxygen adsorption on $Pd–Cu/SiO_2$ catalysis 291
Palladium/silica
Adsorption and catalytic properties of Pd/SiO_2, Cu/SiO_2, and $Pd–Cu/SiO_2$ systems. I. Hydrogen, carbon monoxide and oxygen adsorption on Pd/SiO_2 and Cu/SiO_2 269
Palladium/zeolite
Hydroconversion of n-nonane catalyzed by PdHY zeolites. I. Influence of catalyst pretreatment 15
Palladium/zeolite
Hydroconversion of n-nonane catalyzed by PdHY zeolites. II. Effect of chromium promoter 33
Palladium–copper/silica
Adsorption and catalytic properties of Pd/SiO_2, Cu/SiO_2, and $Pd–Cu/SiO_2$ systems. I. Hydrogen, carbon monoxide and oxygen adsorption on Pd/SiO_2 and Cu/SiO_2 269
Palladium–copper/silica
Adsorption and catalytic properties of Pd/SiO_2, Cu/SiO_2, and $Pd–Cu/SiO_2$ systems. II. Hydrogen, carbon monoxide and oxygen adsorption on $Pd–Cu/SiO_2$ catalysis 291
Palladium–copper/silica
Adsorption and catalytic properties of Pd/SiO_2, Cu/SiO_2, and $Pd–Cu/SiO_2$ systems. III. Carbon monoxide and benzene hydrogenation over $Pd–Cu/SiO_2$ catalysts 305
Phenol
Oxidation of benzoic acid to phenol in the vapor phase III. Reaction of phenol precursors over copper catalysts 201
Photocatalysis
Photocatalytic degradation of nitrophenols in aqueous titanium dioxide dispersion 323
Pillaring
Bulk alloy formation during metal ion poisoning of palladium 85
Pillaring
Synthesis and characterization of pillared montmorillonite catalysts 97
Platinum/zeolite
Synthesis of zeolite β and catalytic isomerization of n-hexane over $Pt/H\text{-}\beta$ catalysts 49
Pore structure
Shape selective catalysis by ZSM-35 zeolites. Disproportionation of ethylbenzene and isomerization of m-xylene 177
Pretreatment
Hydroconversion of n-nonane catalyzed by PdHY zeolites. I. Influence of catalyst pretreatment 15
Promoters
Oxidative conversion of methane to C_2 hydrocarbons over Li, Mn, Cd and Zn promoted MgO catalysts II: Performance of fresh and reoxidised catalysts in the absence of free oxygen 187
Promotional effect
Number of surface V = O species of promoted $(VO)_2P_2O_7$ catalysts L1
Propene hydroformylation
Aqueous phase hydroformylation of propene catalyzed over rhodium complexes immobilized on the poly(styrene–divinylbenzene) copolymer containing $-CH_2P(C_6H_4SO_3H)_2$ groups 169
Propene oligomerization
Propene oligomerization catalyst derived from nickel sulfate supported on γ-alumina 1
Propionitrile hydrogenation
Computer estimation of kinetic parameters in propionitrile hydrogenation on a supported nickel catalyst 75
Reaction mechanism
Computer estimation of kinetic parameters in propionitrile hydrogenation on a supported nickel catalyst 75
Regeneration
Oxidative conversion of methane to C_2 hydrocarbons over Li, Mn, Cd and Zn promoted MgO catalysts II: Performance of fresh and reoxidised catalysts in the absence of free oxygen 187
Rhodium/niobia
Interaction of hydrogen and oxygen with niobia-supported and niobia-promoted rhodium catalysts 253
Rhodium/polymer

Aqueous phase hydroformylation of propene catalyzed over rhodium complexes immobilized on the poly(styrene–divinylbenzene) copolymer containing $-CH_2P(C_6H_4SO_3H)_2$ groups 169

Selective reduction
Influence of sulfur dioxide on catalytic removal of nitric oxide over copper ion-exchanged ZSM-5 zeolite L15

Selectivity
Adsorption and catalytic properties of Pd/SiO_2, Cu/SiO_2, and $Pd–Cu/SiO_2$ systems. III. Carbon monoxide and benzene hydrogenation over $Pd–Cu/SiO_2$ catalysts 305

Selectivity (dimethyl ether)
Kinetics of methanol dehydration on dealuminated H-mordenite: Model with acid and basic active centres 139

Selectivity (isomerization)
Hydroconversion of n-nonane catalyzed by PdHY zeolites. I. Influence of catalyst pretreatment 15

Selectivity (shape-)
Shape selective catalysis by ZSM-35 zeolites. Disproportionation of ethylbenzene and isomerization of m-xylene 177

Selectivity (xylene isomerization)
Isomerization and disproportionation of m-xylene over zeolite β 125

Silver–vanadium/alumina
Complete catalytic oxidation of benzene over supported vanadium oxides modified by silver 221

Sintering
Adsorption and catalytic properties of Pd/SiO_2, Cu/SiO_2, and $Pd–Cu/SiO_2$ systems. II. Hydrogen, carbon monoxide and oxygen adsorption on $Pd–Cu/SiO_2$ catalysis 291

Solid-state NMR, $AlPO_4$-8
Solid-state NMR investigations of $AlPO_4$-8: Its transformation from VPI-5 and interaction with water L7

Spherical granules
Interrelation between structural and mechanical characteristics of spherical alumina granules and the initial hydroxide properties 65

Steam reforming
Mechanistic model for the catalytic cracking of n-hexane over calcium aluminate catalysts for producing light alkenes 105

Strong metal–support interaction
Interaction of hydrogen and oxygen with niobia-supported and niobia-promoted rhodium catalysts 253

Sulphur dioxide
Influence of sulfur dioxide on catalytic removal of nitric oxide over copper ion-exchanged ZSM-5 zeolite L15

Surface vanadium-oxygen species
Number of surface V = O species of promoted $(VO)_2P_2O_7$ catalysts L1

Thiophene hydrodesulphurization
Effect of metal-organic compounds on thiophene hydrodesulphurization over sulphided forms of fluoride-containing $CoMo/Al_2O_3$ catalysts 235

Titanium dioxide
Photocatalytic degradation of nitrophenols in aqueous titanium dioxide dispersion 323

Vanadia/titania/silica
Influence of the preparation method on the $V_2O_5/TiO_2/SiO_2$ catalysts in selective catalytic reduction of nitric oxide with ammonia 149

Vanadium naphthenate
Effect of metal-organic compounds on thiophene hydrodesulphurization over sulphided forms of fluoride-containing $CoMo/Al_2O_3$ catalysts 235

Vanadium–phosphorus oxide
Number of surface V = O species of promoted $(VO)_2P_2O_7$ catalysts L1

Vapour phase oxidation
Oxidation of benzoic acid to phenol in the vapor phase III. Reaction of phenol precursors over copper catalysts 201

VPI-5
Solid-state NMR investigations of $AlPO_4$-8: Its transformation from VPI-5 and interaction with water L7

Xylene disproportionation
Isomerization and disproportionation of m-xylene over zeolite β 125

Xylene isomerization
Isomerization and disproportionation of m-xylene over zeolite β 125

Xylene isomerization
Shape selective catalysis by ZSM-35 zeolites. Disproportionation of ethylbenzene and isomerization of m-xylene 177

Zeolite β synthesis

Synthesis of zeolite β and catalytic isomerization of n-hexane over Pt/H-β catalysts 49

Zeolites
Isomerization and disproportionation of m-xylene over zeolite β 125

Zeolites
Hydroconversion of n-heptane over dealuminated zeolite catalysts 341

Zeolites
Kinetics of methanol dehydration on dealuminated H-mordenite: Model with acid and basic active centres 139

Zeolites
Kinetics of methanol dehydration on dealuminated H-mordenite: Model with acid and basic active centres 139

Zeolites
Hydroconversion of n-nonane catalyzed by PdHY zeolites. I. Influence of catalyst pretreatment 15

Zeolites
Shape selective catalysis by ZSM-35 zeolites. Disproportionation of ethylbenzene and isomerization of m-xylene 177

Zeolites
Influence of sulfur dioxide on catalytic removal of nitric oxide over copper ion-exchanged ZSM-5 zeolite L15

Zeolites
Synthesis of zeolite β and catalytic isomerization of n-hexane over Pt/H-β catalysts 49

Zeolites
Hydroconversion of n-nonane catalyzed by PdHY zeolites. II. Effect of chromium promoter 33

ZSM-5
Influence of sulfur dioxide on catalytic removal of nitric oxide over copper ion-exchanged ZSM-5 zeolite L15
